COMPUTING AND REALITY CAPTURE CONNECT

energAIZE

6th Annual Industrial IMMERSIVE Week

“Where the Real-World Industrial Metaverse Connects”

The Industrial IMMERSIVE Week attracts the most Industrial/Energy & Engineering tech professionals making investment, strategy & tactical decisions, or building, scaling and executing pioneering XR/3D/AI, digital twin, edge / spatial computing, reality capture & connected workforce projects within their enterprise.

“Industrial IMMERSIVE week 2023. A great showcase and presentation of new technologies some of them with AI Virtual reality Augmented Reality, integration to optimize process and changing the way to work.” - Marisabel M

“The best way to stay at the forefront of technology advancements - by learning from the source at the Industrial IMMERSIVE Conference in Houston, TX.” - Industrial 3D

“Day 2 of Industrial IMMERSIVE was packed with insights. Sean McCoy emceed the day and Athicha Dhanormchitphong and Kyle Daughtry’s keynote on ExxonMobil’s visual way of work stood out. Their presentation delivered great insight into the industry challenges to scale digital twins.” - Ali Kashi, Radix Engineering & Software
